Product description

The intelligent magnetic grid lamp is an intelligent dimming and color-modifying lamp based on the Zigbee protocol. It is suitable for indoor lighting. It has the advantages of stable communication, precise dimming, and convenient installation. It can realize the intelligent upgrade of home lighting—that is, the lamps can be controlled by the switch panel, remote control, and voice, and the lamps can be controlled by smart terminals such as smartphones. Remote control and scene control (need to scan the QR code in the manual and download the "ORVIBO Home" App)

Product List

Smart magnetic track grille light X1

Manual x1

Installation instructions

① Be sure to cut off the power before installation, and strictly follow the instructions
② Do not use in humid environments such as outdoors or bathrooms
③ It is recommended to install by a professional electrician, and no live operation is allowed

Installation guide

Please cut off the power before installation!
① Installation: install the product vertically into the matching magnetic track
② Electrified: it can be used after connecting the matching power

Configuration guide

① The device is connected to the network: The device needs to be connected to the Internet through MixPad. After the first power-on, use the "Smart Home 365" APP to add the device. After the lamp is connected to the network, the light turns to a cool color, which means the addition is successful. Scan code to download ORVIBO Home App.

Scan to download ORVIBO Home App

② Restore factory settings: power on and off for five times (each power on for 3 seconds, power off for 3 seconds), the lamp will flash alternately in warm white for 2 times and then restore to factory settings, you can reconnect to the network.

* Suggestion: No more than 50 lights per Mixpad.

Parameter

Product model	DG10GA	Product model	DG10GA
Product length	207mm	Product length	410mm
Beam Angle	70°	Beam Angle	70°
Rated power	8W	Rated power	15W
Photosynthetic efficiency	70–80LM/W	Photosynthetic efficiency	70–80LM/W
The input voltage	48V		
Color temperature range	2700K–6000K		
Working temperature	–20℃–+50℃		
Relative humidity	20 ~ 90% RH		
Communication protocol	Zigbee
